# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Seasonal temperatures can be expected across the Northern interior for the next few days. Remnant moisture combined with some instability will generate a slight risk of thunderstorms for parts of the interior each afternoon and evening today through early next week. Coastal locations can expect overnight low clouds and fog with partial clearing each afternoon.

#### **San Francisco Weather:**

Look for quiet weather with near normal temperatures through the weekend.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

A little warming today then near normal temperatures through the middle of next week. Afternoon and evening thunderstorms are possible over the mountains each afternoon and evening through at least next Monday.

#### **Hanford Weather:**

A low pressure area will move east of the San Joaquin Valley today with a dry westerly flow prevailing and a slight warming trend taking place. Another low will approach the Central California coast over the weekend lowering temperatures to near seasonal normals. Thunderstorms are possible during the afternoon hours over the crest of the southern Sierra Nevada; otherwise, precipitation is not expected for the next several days.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

A lingering upper level trough will result in night through morning low clouds and fog for the coast and some valleys along with slightly below normal temperatures.

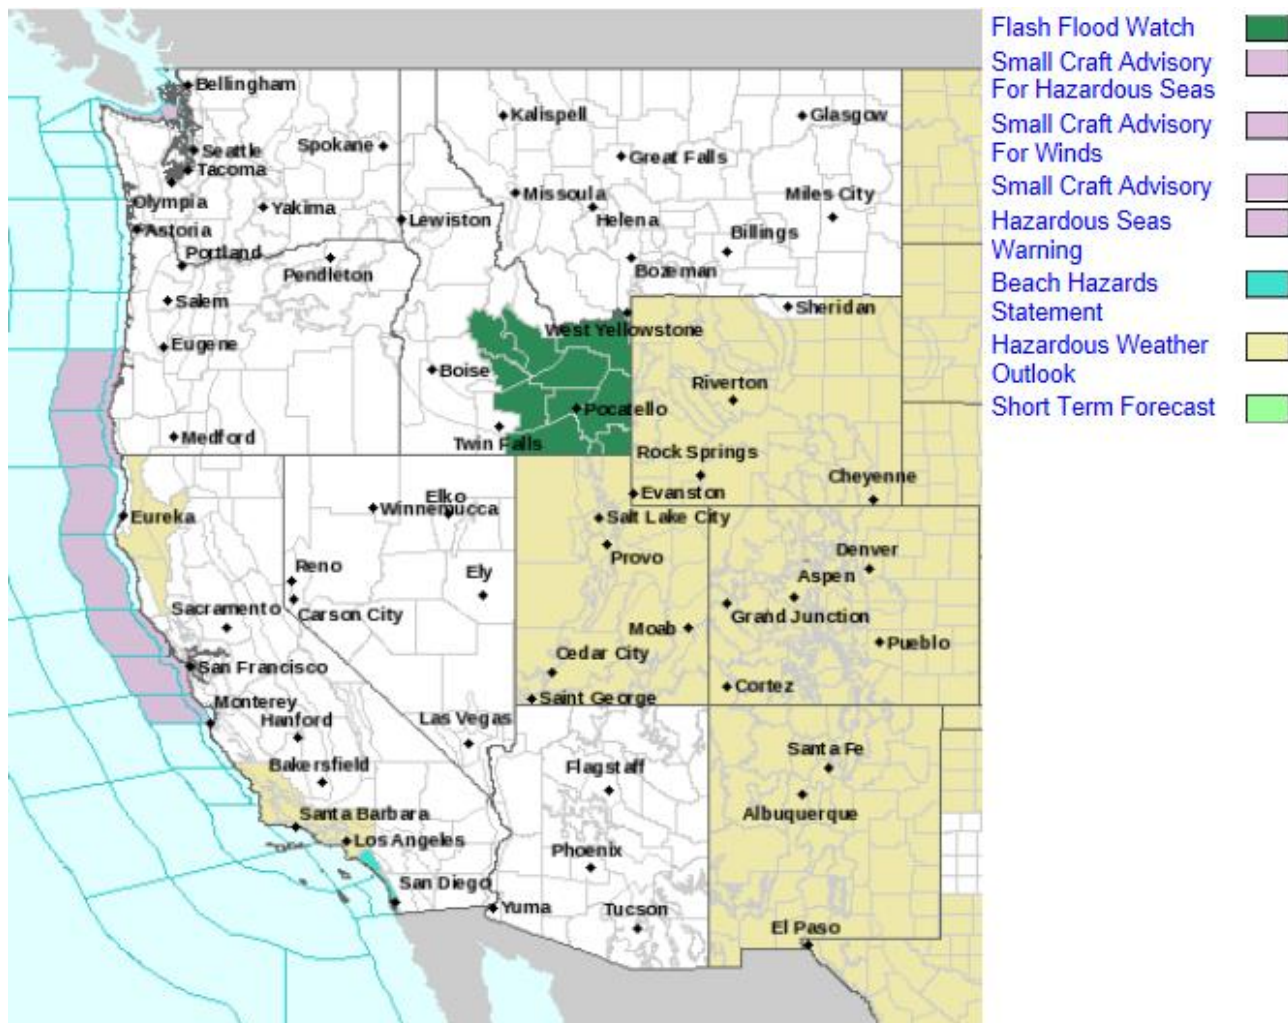

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

A trough of low pressure over Central California will bring dry weather with seasonal temperatures into the weekend with night and morning low clouds and patchy fog for the coast and western valleys along with gusty west winds in the mountains and deserts in the afternoon and evening. Monsoonal moisture may bring afternoon and early evening thunderstorms to the mountains and deserts as early as Sunday and continuing into the middle of next week.

#### **Southeast California Weather:**

A few thunderstorms will be confined mainly to the southern sierra. Monsoon moisture will begin to return to Southeast California early next week.

# **CAL OES ACTIVATIONS**

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

## Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 3<sup>rd</sup>: Don Pedro 44%; Exchequer 20%; Folsom Lake 41%; Lake Oroville 35%; Millerton Lake 52%; New Melones 26%; Pine Flat 13%; San Luis 22%; Lake Shasta 34%; Trinity Lake 35%; Pyramid Lake 93%; and Castaic Lake 47%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

## Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

- W21: Water in the 21st Century Legislation Introduced: California Sens. Barbara Boxer and Dianne Feinstein along with their House colleagues Reps. Grace Napolitano (D-CA-32) and Peter DeFazio (D-OR) introduced legislation to promote water conservation and recycling on Thursday, July 31. The identical House and Senate bills, entitled "W21: Water in the 21st Century," expand rebates and grants for water conservation and efficiency; support local investments in water recycling and improved groundwater management and storage; invest in research into water-saving technologies and desalination; and establish an open water data system.
